Pan-International Industrial Corp. August 2026 Revenue Briefing

Pan-International Industrial Corp. (TWSE: 2328) today announced its unaudited consolidated revenue for August 2026, totaling NT$2.166 billion. This figure represents a month-on-month (MoM) increase of 5.68% and a year-on-year (YoY) increase of 19.67%. Cumulative consolidated revenue for January through July 2026 reached NT$13.845 billion, reflecting a 7.84% decline compared to the same period in 2025.

In August, revenue maintained its upward trend, driven by sustained pull-in momentum from existing clients and increased shipments from new business. Compared to the lower base of the same period last year—when customer shipments were dampened by U.S. tariffs—year-over-year (YoY) revenue posted substantial growth. Cumulatively, YoY revenue still contracted because shipment volumes from legacy clients lagged behind last year's levels, though the rate of decline continues to narrow. Looking ahead to the fourth quarter, the company will actively execute its shipment roadmap for AI server and robotics-related products while pursuing new device orders from consumer electronics and automotive clients to boost monthly revenue.

To navigate current market challenges, the company is actively pursuing orders in the AI server segment to bolster revenue growth. Concurrently, our core strategic objective remains profitability optimization. We are committed to penetrating the high-end product lines of existing clients and increasing the revenue contribution from high-margin product categories. Furthermore, we are strategically positioning ourselves in the humanoid robotics market.

Leveraging our deep expertise and proven track record in cables and wire harnesses, we aim to expand into critical components for humanoid robots, establishing a new growth engine for both top-line revenue and bottom-line profitability.
